Extra Solar Planets P. BENJAMIN DIXON, SUNY - Stony Brook — Currently there are many projects being conducted and being planned to detect extra solar planets. The talk will introduce the topic of extra solar planets and its significance. A brief history of extra solar detection will be discussed. The main focus of the talk will be explaining the different detection and observation techniques for extra solar planets. The present situation and near past will be discussed and then the future projects and prospects will be discussed.
