

String Landscape and the Swampland

2006 Simons Workshop in Mathematics and Physics

Stony Brook University, July 24 - August 25, 2006

C.N. Yang Institute for Theoretical Physics

and Department of Mathematics

Scientific Advisor: Cumrun Vafa (Harvard)

Local Coordinator: Martin Roček

Participants Include:

*Mina Aganagic (U.C. Berkeley)
Katrín Becker (Texas A&M)
Melanie Becker (Texas A&M)
Nathan Berkovits (Sao Paolo)
Atish Dabholkar (Tata Institute)
Jacques Distler (Texas Austin)
Fay Dowker (Imperial College, London)
Bernard de Wit (Utrecht)
Jerome Gauntlett (Imperial College, London)
Sergei Gukov (CalTech)
Dan Kabat (Columbia)
Shamit Kachru (Stanford)
Sheldon Katz (Illinois Urbana-Champaign)
Ulf Lindström (Uppsala)
David Lowe (Brown)
Juan Maldacena (IAS, Princeton)
Gregory Moore (Rutgers)
Dave Morrison (Duke & Santa Barbara)
Duong Phong (Columbia)
Nicholas Proudfoot (Texas Austin)
Sanjaye Ramgoolam (Queen Mary, London)
Koenraad Schalm (Amsterdam)
Kostas Skenderis (Amsterdam)
Mattias Staudacher (MPI, Potsdam)
Marika Taylor (Amsterdam)
Stefan Vandoren (Utrecht)
Herman Verlinde (Princeton)
Rikard von Unge (Masaryk)
Maxim Zabzine (Uppsala)*

Local Participants Include:

*Mike Anderson
Alfred Goldhaber
Detlef Gromoll
C. Denson Hill
Jerome Jenquin
Alexander Kirillov
Vladimir Korepin
Masafumi Kurachi
Blaine Lawson
Claude LeBrun
William D. Linch III
Misha Lyubich
Gouranga Nayak
Ari Pakman
Andrei Parnachev
Sorin Popescu
Leonardo Rastelli
Martin Roček
Robert Shrock
Warren Siegel
George Sterman
Dennis Sullivan
Leon Takhtajan
Brenno Vallilo
Peter van Nieuwenhuizen
William Weisberger
Robert Wimmer
Aleksey Zinger*

The Simons Workshops focus on the intersection between physics and mathematics, particularly in the context of string theory. One of the themes of this workshop will be the String Landscape and the Swampland – what are the general constraints on low energy physics that follow from string theory?
