

## Publications

1. The  $S$ -matrix for Scattering Composite Systems, with Th. W. Ruygrok, *Physica* **33** 595 (1967).
2. Finiteness of Radiative Corrections in all Orders to  $\mu$ -decay, *Nucl. Phys.* **B7** 160 (1968).
3. Muon-electron Scattering Cross-Section to Order  $\alpha^3$ , *Nucl. Phys.* **B41** 626 (1972).
4. Invariant Amplitudes and Double Dispersion Relations of Electron-Muon Scattering, with J. Oberholzer, *Nucl. Phys.* **B41** 626 (1972).
5. Radiation of Massive Gravitation, *Phys. Rev.* **D7** 2300 (1973).
6. On Ghost-Free Tensor Lagrangians and Linearized Gravitation, *Nucl. Phys.* **B60** 478 (1973).
7. Nonrenormalizability of Einstein-Yang-Mills Interactions at the One-loop Level, with S. Deser, Hung-Sheng Tsao, *Phys. Letts.* **B50** 491 (1974).
8. Nonrenormalizability of the Quantized Einstein-Maxwell System, with S. Deser, *Phys. Rev. Letts.* **32** 245 (1974).
9. One-loop Divergences of Quantized Einstein-Maxwell Fields, with S. Deser, *Phys. Rev.* **D10** 401 (1974).
10. Nonrenormalizability of the Quantized Dirac-Einstein System, with S. Deser, *Phys. Rev.* **D10** 411 (1974).
11. Uniqueness and Nonrenormalizability of Quantum Gravitation, with D. Boulware and S. Deser, Proceedings of the 7th International Conference on Gravitation GR7, Tel-Aviv, 1974, Halsted Press 1985.
12. Non-renormalizability of Quantized Fermion-Graviton Interactions, *Lett. al Nuov. Cim.* **11** 218 (1974).
13. One-Loop Divergences of the Einstein-Yang-Mills System, with S. Deser and Hung-Sheng Tsao, *Phys. Rev.* **D10** 3337 (1974).
14. Gravitational Born Amplitudes and Kinematical Constraints, with M. T. Grisaru and C. C. Wu, *Phys. Rev.* **D12** 397 (1975).

15. Reggeization and the Questions of Higher-Loop Renormalizability, with M. T. Grisaru and C. C. Wu, *Phys. Rev. D* **12** 1563 (1975).
16. Gravitational Corrections to Lepton-Lepton Coulomb Scattering, with M. T. Grisaru and C. C. Wu, *Phys. Rev. D* **12** 1813 (1975).
17. Background Field Method versus Normal Field Theory: One-Loop Divergences in S-matrix and Green's Functions for Yang-Mills Fields and Gravitational Fields, with M. T. Grisaru, and C. C. Wu, *Phys. Rev. D* **12** 3203 (1975).
18. Scale Dependence and the Renormalization Problem of Quantum Gravity, with S. Deser, M. T. Grisaru, and C. C. Wu., *Phys. Lett.* **58B** 355 (1975).
19. An Introduction to Covariant Quantization of Gravitation, Proceedings of the First 1975 Grosman Conference, North-Holland 1977.
20. On a Regular Solution of 't Hooft's Magnetic Monopole Model in Curved Space, with D. Wilkinson, *Phys. Rev. D* **13** 778 (1976).
21. Spin and Torsion in Quantum Gravity, Proc. 2nd Latin-American Conference on Gen. Rel., December 1975.
22. Progress toward a Theory of Supergravity, with D. Z. Freedman and S. Ferrara, *Phys. Rev. D* **13** 3214 (1976).
23. Properties of Supergravity Theory, with D. Z. Freedman, *Phys. Rev. D* **14** 912 (1976).
24. Local Supersymmetry and Gravitation, in "Asymptotic Structure of Spacetime", Proc. Cincinnati Conference 1976, Plenum Press (1977).
25. On the Integral Relations for Invariants Constructed from Three Riemann Tensors and their Applications in Quantum Gravity, with C. C. Wu, *J. Math. Phys.* **18**, 182 (1977).
26. On the Renormalization of Quantum Gravity without Matter, *Ann. of Physics* **104** 197 (1977).
27. Supergravity and the S-Matrix, with M. T. Grisaru and H. Pendleton, *Phys. Rev. D* **15** 996 (1977).
28. Local Supersymmetry and Gravitation, Proc. Tbilisi Conference, U.S.S.R., July 15-21, 1976.

29. Locally Supersymmetric Maxwell-Einstein Theory, with S. Ferrara and J. Scherk, *Phys. Rev. Lett.* **37** 1035 (1976).
30. Matter Couplings in Supergravity Theory, with S. Ferrara, F. Gliozzi and J. Scherk, *Nucl. Phys.* B**117** 333 (1977).
31. Scalar Multiplet Coupled to Supergravity, with S. Ferrara, D. Z. Freedman, F. Gliozzi, J. Scherk and P. Breitenlohner, *Physical Review* D**15** 1013 (1977).
32. One-Loop Divergences in the Quantum Theory of Supergravity, with J. A. Vermaseren, *Phys. Lett.* B**65** 263 (1976).
33. Consistent Supergravity with Complex Spin 3/2 Gauge Fields, with S. Ferrara, *Phys. Rev. Lett.* **37** 1669 (1976).
34. One-Loop Renormalizability of Pure Supergravity and the Maxwell-Einstein Theory in Extended Supergravity, with M. T. Grisaru and J. A. M. Vermaseren, *Phys. Rev. Lett.* **37** 1662 (1976).
35. Local Supersymmetry and Supergravity, Proc. 1976 Brookhaven Conference.
36. BRS Gauge and Ghost Field Supersymmetry in Gravity and Supergravity, with P. Townsend, *Nucl. Phys.* B**120** 301 (1977).
37. Renormalizability of Supergravity, with M. T. Grisaru, Proc. Coral Gables Conference, 1977, Plenum Press 1977.
38. Finiteness of  $SO_3$  and  $SO_4$  Supergravity and Nonrenormalizability of the Scalar Multiplete Coupling in Explicit One-Loop Examples, with J. A. M. Vermaseren, *Phys. Rev.* D**16** 298 (1977).
39. Geometrical Interpretation of Extended Supergravity, with P. K. Townsend, *Phys. Lett. B* **67** 439 (1977).
40. Gauge Theory of the Conformal and Graded Conformal Group, with M. Kaku and P. K. Townsend, *Phys. Lett.* B**69** 304 (1977).
41. Axial anomalies in Simple Supergravity, with M. T. Grisaru and D. Z. Freedman, *Phys. Lett.* B**71** 377 (1977).
42. Unified Field Theories with  $U(N)$  Internal Symmetries: Gauging the Superconformal Group, with S. Ferrara, M. Kaku and P. K. Townsend, *Nucl. Phys.* B**129** 125 (1977).

43. Classical solutions in supergravity, with N. Baaklini and S. Ferrara, *Lett. Nuovo Cimento* **20** 113 (1977).
44. Superconformal unified field theory, with M. Kaku and P. K. Townsend, *Phys. Rev. Lett.* **39** 1109 (1977).
45. Unitary Ward Identities and BRS Invariance, with G. Sterman and P. K. Townsend, *Phys. Rev. D* **17** 1501 (1978).
46. Properties of Conformal Supergravity, with M. Kaku and P. K. Townsend, *Phys. Rev. D* **17** 3179 (1978).
47. Supergravity, *Scientific American*, February 1978, with D. Z. Freedman.
48. The Auxiliary Fields of Supergravity, with S. Ferrara, *Phys. Lett.* **B74** 333 (1978).
49. Poincaré and Conformal Supergravity Models and Closed Algebras, with S. Ferrara and M. T. Grisaru, *Nucl. Phys.* **B138** 430 (1978).
50. Tensor Calculus for Supergravity, with S. Ferrara, *Phys. Lett.* **B76** 404 (1978).
51. Covariant Quantization of Supergravity, Proc. 1978 Coral Gables Conf., Plenum Press 1978.
52. The Auxiliary Field Structure in Chirally Extended Supergravity, with B. de Wit, *Nucl. Phys.* **B139** 216 (1978).
53. Approaches to the Gravitational Spin 3/2 Axial Anomaly, with M. T. Grisaru, H. Romer and N. K. Nielsen, *Nucl. Phys.* **B140** 477 (1978).
54. Structure of Supergravity, with S. Ferrara, *Phys. Lett.* **B78** 573 (1978).
55. Super-Higgs Effect in Supergravity with General Scalar Interactions, *Phys. Lett.* **79B** 231 (1978).
56. Introductory Review of Supergravity, Waterloo Conf. 1977, General Relativity and Gravitation **10** 211 (1979).
57. Anomalies, Topological Invariants and the Gauss-Bonnet Theorem in Supergravity, with P. K. Townsend, *Phys. Rev. D* **19** 3592 (1979).
58. Simplifications of Conformal Supergravity, with P. K. Townsend, *Phys. Rev. D* **19** 3166 (1979).

59. On Spin 5/2 Gauge Fields, with F. A. Berends and J. W. van Holten, and B. de Wit, *Phys. Lett.* **B83** 188 (1979).
60. On Field Theory for Massive and Massless Spin 5/2 Fields, with F. A. Berends, B. de Wit and J. W. van Holten, *Nucl. Phys.* **B154** 261 (1979).
61. On Spin 5/2 Gauge Field, with F. A. Berends, J. W. van Holten and B. de Wit, *J. Phys.* **A13** 1643 (1980).
62. Lectures in Supergravity in “Recent Developments in Gravitation”, Cargèse Summer School 1978, Plenum Press, 1979.
63. Simplifications of Einstein Supergravity, with S. Ferrara, *Phys. Rev.* **D20** 2079 (1979).
64. Spontaneous Symmetry Breaking and Higgs Effect in Supergravity without Cosmological Term, with E. Cremmer, B. Julia, J. Scherk, S. Ferrara and L. Girardello, *Nucl. Phys.* **B147** 105 (1979).
65. Dimensional Regularization and Supersymmetry at the Two-Loop Level, with P. K. Townsend, *Phys. Rev.* **D20** 1832 (1979).
66. Supergravity: An Odyssey Through Spacetime and Superspace, with S. Ferrara, in “General Relativity and Gravitation, One Hundred Years after the Birth of Albert Einstein,” Vol. I, A. Held, ed., Plenum Press (1980).
67. Four Lectures at the 1979 Erice School on Spin, Torsion, Rotation and Supergravity, in “Cosmology and Gravitation”, V. de Sabbata and P. G. Bergmann, eds., Plenum Press (1980).
68. Supergravity with and without Superspace, with S. Ferrara, *Ann. of Phys.* **127** 274 (1980).
69. Supergravity, in “Some Strangeness in the Proportion”, Proceedings Princeton Einstein Centennial Symposium, Editor, H. Woolf, Addison-Wesley, 1980.
70. Regularization by Dimensional Reduction of Supersymmetric and Non-Supersymmetric Gauge Theories, with D. M. Capper and D. R. T. Jones, *Nucl. Phys.* **B167** 479 (1980).
71. Transversability of the Gravitino Self Energy, Ward Identities and Dimensional Reduction, with M. K. Fung and D. R. T. Jones, *Phys. Rev.* **D22** 2995 (1980).

72. New Ghost-Free Gravity Lagrangians with Propagating Torsion, with E. Sezgin, *Phys. Rev. D* **21** 3269 (1980).
73. Renormalizability Properties of Antisymmetric Tensor Fields Coupled to Gravity, with E. Sezgin, *Phys. Rev. D* **22**, 301 (1980).
74. Quantum Inequivalence of Different Field Representations, with M. J. Duff, *Phys. Lett.* **94B** 179 (1980).
75. Unitarity of Supergravity and  $Z_2$  or  $Z_2 \times Z_2$  or  $Z_2 \times Z_2 \times Z_2$  Gradings of Gauge and Ghost Fields, *J. Math. Phys.* **21** 2562 (1980).
76. “Supergravity” Proceedings 1979 Stony Brook Workshop, P. van Nieuwenhuizen and D. Z. Freedman, eds., North-Holland 1979.
77. Supergravity with and without Superspace, contribution to 76.
78. From Conformal Supergravity in Ordinary Space to its Superspace Constraints, with P. C. West, *Nucl. Phys. B* **169** 501 (1980).
79. The Constraints for  $N = 2$  Superspace from Extended Supergravity in Ordinary Space, with L. Castellani and S. J. Gates, *Phys. Rev. D* **22** 2364 (1980).
80. (Quantum) Supergravity, in “Quantum Gravity 2”, C. J. Isham, R. Penrose and D. W. Sciama, eds., Clarendon Press, Oxford, 1981.
81. Six Lectures at the Cambridge Workshop on Supergravity, in “Superspace and Supergravity”, S. W. Hawking and M. Rocek, eds., Cambridge University Press, 1981.
82. Supersymmetric Dimensional Regularization, with W. Siegel and P. K. Townsend, contribution in (81).
83. Supergravity as a Gauge Theory Derived from Matter Couplings, Lecture Notes in Physics, **116** 276 (1980) K. Osterwalder, ed.
84. Unification of the Fundamental Particle Interactions, “Euro-physics Workshop at Erice 1980”, S. Ferrara, J. Ellis and P. van Nieuwenhuizen, eds., Plenum, 1980.
85. What is Supergravity and which of its Aims have been Reached, contribution in (84).
86. Supergravity and Phenomenology, in “Current Topics in Elementary Particle Interactions” K. H. Mutter and K. Schilling, eds., Plenum 1981.

87. Renormalizability Properties of Spontaneously Broken  $N = 8$  Supergravity, with E. Sezgin, *Nucl. Phys.* **B195** 325 (1982).
88. First Order Tetrad Gravity in Dirac's Hamiltonian Formalism with L. Castellani and M. Pilati, *Phys. Rev.* **D26** 352 (1982).
89. A Review of the Group Manifold Approach and its Application to Conformal Supergravity, with L. Castellani and P. Fré, *Ann. of Phys.* **136** 398 (1981).
90. Comments on Different Derivations of  $N = 2$  Supergravity Using the Group Manifold, *Phys. Rev.* **D24**, 3058 (1981).
91. Speculations Concerning a Fermionic Substructure of Space-time, with J. H. Schwarz, *Nuovo Cim. Lett.* **34** 21 (1981).
92. Quantization of 11-Dimensional Supergravity, with B. de Wit and A. Van Proeyen, *Phys. Lett.* **B104** 27 (1981).
93. Classical Gauge Fixing in Quantum Field Theory, *Phys. Rev.* **D24** 3315 (1981).
94. Ten-dimensional Maxwell-Einstein Supergravity, its Currents, and the Issue of its Auxiliary Fields, with E. Bergshoeff, M. de Roo and B. de Wit, *Nucl. Phys.* **B195** 97 (1982).
95. Supergravity in High Dimensions, in "Quantum Structure of Space and Time" Proceedings Nuffield Workshop, London, C.U.P., 1982, M. J. Duff and C. J. Isham, eds.
96. Generalized BRST Quantization of Gauge Field-Theory, with F. R. Ore, Jr., *Phys. Letts.* **112B** 364 (1982).
97. Explicit Construction of the Exceptional Superalgebras  $F(4)$  and  $G(2)$ , with B. S. De Witt, *J. Math. Phys.* **23** 1953 (1982).
98. Six Lectures at the Trieste 1981 School, in the Proceedings, S. Ferrara and J. G. Taylor, eds., Cambridge Univ. Press, 1982.
99. Supergravity, *Physics Report* **68** 189-398 (1981).
100. Five Lectures at the University of Toronto, Internal Report.
101. Which Field Representations are Allowed in Interacting Locally Supersymmetric Field Theories, with P. K. Townsend, *Phys. Lett.* **B109** 179 (1982).

102. Local BRST Symmetry and the Geometry of Gauge Fixing, with F. Ore, Jr., *Nucl. Phys. B* **204** 317 (1982).
103. A Geometrical Approach to Quantum Field Theory, with F. Ore, Jr., Proceedings 1982, Coral Gables Conference.
104. Comments on 11-Dimensional Supergravity, with H. Nicolai and P. K. Townsend, *Lett. Nuov. Cimento* **30** 315 (1981).
105. “Supergravity and Geometry” in Proceedings of the 9th Conference on General Relativity and Gravitation, GR9 Jena, 1981, DDR, E. Schmutzer, ed., 1983.
106. Gauging of  $d = 11$  Supergravity? with L. Castellani, P. Fré, F. Giani, K. Pilch, *Ann. Phys.* **146** 35 (1983).
107. Beyond  $d = 11$  Supergravity and Cartan Integrable Systems, with L. Castellani, P. Fré, F. Giani and K. Pilch, *Phys. Rev. D* **26** 1481 (1982).
108. Counting of States in Conformal Theories, with L.-Y. Lee, *Phys. Rev. D* **26**, 934 (1982).
109. Quadratic and Quartic One Loop Divergences in Gauge Theories and their Cancellation in Supergravity, with L. Castellani, *Nucl. Phys. B* **213** 305 (1983).
110. Geometrical and Quantum Mechanical Aspects of Supergravity, John-Hopkins Meeting in Florence, June 1982, ed. by Johns Hopkins University, Baltimore, MD 21218.
111. Ultraviolet Finiteness of  $N = 8$  Supergravity Spontaneously Broken by Dimensional Reduction, with E. Sezgin, *Phys. Lett. B* **119** 117 (1982).
112. The Group Manifold Approach to Off-Shell  $N = 1$  Supergravity, with P. K. Townsend, Ecole Normale preprint.
113. Four lectures on the group manifold: Proceedings 1982 Ettore Majorana School on “Unified Field Theories of more than 4 Dimensions Including Exact Solutions, V. DeSabbata and E. Schmutzer, eds., World Publ. (1983).
114. Renormalizability and Extended BRST Symmetry, with A. van de Ven.
115. Dimensional Reduction of Simple  $d = 10$  Supergravity, with L. Castellani and K. Pilch.
116. Spontaneous Compactification of Supergravity on the Three-Sphere, with M. J. Duff and P. K. Townsend, *Phys. Lett. B* **122** 232 (1983).

117. Symmetry Breaking in  $d = 11$  Supergravity on the Parallelized Seven-Sphere, with R. D'Auria and P. Fré, *Phys. Lett.* **122B** 225 (1983).
118. Gauging of Groups and Supergroups, Proceedings 1982 Chicago AMS-SIAM Seminar on Group-Theoretical Methods in Physics, Lectures in Applied Mathematics, **21** 139 (1985).
119. Supergravity on Three-Spheres, Proceedings Seminar on Group-Theoretical Methods in Physics, Moscow 1982, CERN Th 3497.
120. Free Graded Differential Superalgebras, Proceedings 1982 Istanbul Conference on "Group-Theoretical Methods in Physics", M. Serdaroglu and E. Inonu, eds., Lectures Notes in Physics **180**.
121. Gauged Seven-Dimensional Supergravity, with P. K. Townsend, *Phys. Lett.* **B125** 41 (1983).
122. Noether Coupling of Massive Gravitinos to  $N = 1$  Supergravity, with S. Ferrara, *Phys. Lett.* **B127** 70 (1983).
123. Geometry of Coset Spaces and Massless Modes of the Squashed Seven Sphere in Supergravity, with F. A. Bais and H. Nicolai, *Nucl. Phys.* **B228** 333 (1983).
124. Holonomy Groups, Sesquidual Torsion Fields and  $SU(8)$  in Supergravity with R. D'Auria and P. Fré, *J. Math. Phys.* **25** 3209 (1984).
125. Local Compactification and Black Holes in Supergravity, with P. van Baal and F. A. Bais, *Nucl. Phys.* **B233** 477 (1984).
126. Invariance of Actions, Rheonomy and the New Minimal  $N = 1$  Supergravity in the Group Manifold Approach, with R. D'Auria, P. Fré and P. K. Townsend, *Ann. of Phys.* **155** 423 (1984).
127.  $N = 2$  Matter Coupled Supergravity from Compactification on a Coset  $G/H$  Possessing an Additional Killing Vector, with R. D'Auria and P. Fré, *Phys. Lett.* **B136** 347 (1984).
128. Integrability Conditions for Killing spinors, with N. P. Warner, *Comm. Math. Physics* **93** 227 (1984).
129. An Introduction to Simple Supergravity and the Kaluza-Klein Program, Lectures at the 1983 les Houches School, B. S. DeWitt and R. Stora, eds., North-Holland 1984.

130. Self-duality in Odd Dimensions, with P. K. Townsend and K. Pilch, *Phys. Lett.* **B136** 38 (1984).
131. Compactification of  $d = 11$  Supergravity on  $S^4$  (or  $11=7+4$ , too) with P. K. Townsend and K. Pilch, *Nucl. Phys.* **B242** 377 (1984).
132. Fermion Masses for the Englert Solution on the Round 7-Sphere, with L. Castellani, R. D'Auria, P. Fré and K. Pilch, *Phys. Rev.* **D30** 1688 (1984).
133. The Bosonic Mass Formula for Freund-Rubin Solutions of  $d = 11$  Supergravity on General Coset Manifolds, with L. Castellani, R. D'Auria, P. Fré and K. Pilch, *Class and Quantum Gravity* **1** 339 (1984).
134. The Complete Mass Spectrum, of  $d = 11$  Supergravity Compactification on  $S_4$  and a General Mass Formula for Arbitrary Cosets  $M_4$ , *Class and Quantum Gravity*, **2** 1 (1985).
135. Stability of Gauged  $d = 7$  Supergravity and the Definition of Masslessness in  $adS(7)$  with L. Mezincescu and P. K. Townsend, *Phys. Lett.* **143B** 384 (1984).
136. Gauged Maximal Extended Supergravity in Seven Dimensions, with M. Pernici and K. Pilch, *Phys. Lett.* **B143** 103 (1984).
137. Gauged  $N = 4$   $d = 6$  Supergravity, with F. Giani and M. Pernici, *Phys. Rev.* **D30** 1680 (1984).
138. Noncompact Gauging and Critical Points of Maximal Supergravity in Seven Dimensions, with M. Pernici, K. Pilch and N. P. Warner, *Nucl. Phys.* **B249** 381 (1985).
139. de Sitter Superalgebras and Supergravity, with K. Pilch, and M. F. Sohnius, *Comm. Math. Phys.* **98** 105 (1985).
140. General Theory of Coset Manifolds and Antisymmetric Tensors Applied to Kaluza-Klein Supergravity, Proceedings 1984 Trieste School on Supergravity, World Scientific Publ. Co., 1984, see 140.
141. "Supersymmetry and Supergravity '84", Proceedings 1984 Trieste School on Supersymmetry and Supergravity, B. de Wit, P. Fayet and P. van Nieuwenhuizen, eds., World Publ. Co., 1984.
142. Comment on "Self-Duality in Odd Dimensions," *Phys. Lett.* **137** 443 (1984).

143. New Compactifications on Ten- and Eleven-Dimensional Supergravity on Manifolds which are not Direct Products, with N. P. Warner, *Comm. Math. Phys.* **99** 141 (1985).
144. General Construction of the Unitary Representations of Anti-deSitter Superalgebras and the Spectrum of the  $S^4$  Compactification of 11-Dimensional Supergravity, with M. Gunaydin and N. P. Warner, *Nucl. Phys.* **B255** 63 (1985).
145. Does Spacetime Have More Than Four Dimensions?, with D. Z. Freedman, *Scientific American*, March 1985.
146. Gauged  $N = 8$   $d = 5$  Supergravity, with M. Pernici and K. Pilch, *Nucl. Phys.* **B259** 460 (1985).
147. The Mass Spectrum of  $d = 10$ ,  $N = 2$  Supergravity on  $S^5$ , with H. Y. Kim and L. J. Romans, *Phys. Rev.* **D32** 389 (1985).
148. Chern-Simons terms in Kaluza-Klein Supergravity, Proc. APS 1984 Meeting in Los Alamos, World Scientific 1985, T. Goldman and M. Nieto, eds.
149. Supergravity and the Kaluza-Klein Program, Proc. 1983, G.R. 10 Meeting in Padua, Italy, B. Bertotti et al. eds.
150. Constraints in Conformal Simple Supergravity, contribution to Festschrift Y. Ne'eman, Cambridge University Press, 1986.
151.  $D = 3$  Conformal Supergravity and Chern-Simons Terms, *Phys. Rev.* **D32** 872 (1985).
152. The Chiral Anomaly in Conformal and Ordinary Simple Supergravity in Fujikawa's Approach, with P. H. Frampton, D. R. T. Jones, S. C. Zhang, contribution to Festschrift for E. S. Fradkin.
153.  $N \geq 2$  Supersymmetric Chern-Simons Terms as  $d = 3$  Extended Conformal Supergravity, with M. Rocek, *J. of Class. and Quant. Gravity* **3** 43 (1986).
154. Progress Towards the Supersymmetrization of Chern-Simons Terms in Five Dimensional Simple Supergravity, with M. Rocek and S. C. Zhang, *Phys. Rev.* **D33** 370 (1986).
155. Axial Anomalies in  $N = 4$  Conformal Supergravity, with H. Römer, *Phys. Lett.* **B162** 290 (1985).

156. Relations Between Chern-Simons Terms, Anomalies and Conformal Supergravity, in “Supersymmetry and its Application: Superstrings, Anomalies and Supergravity”, G. W. Gibbons, S. W. Hawking, P. K. Townsend, eds., Proceedings Cambridge Workshop, July 1985, Cambridge University Press, 1986.
157. Harmonics and Spectra on General Coset Manifolds, with A. Eastaugh, in “Quantum Gravity and Cosmology”, Proc. 8th Kyoto Summer Institute, Kyoto, 1985, H. Sato and T. Inami, eds., World Scientific.
158. Connections Between Supergravity and Strings, in “Superstrings and Supergravity”, proceedings 28th Scottish Universities Summer School in Physics, Edinburgh, 1985, A. T. Davies and D. G. Sutherland, eds., the Scottish Universities Summer School Physics.
159. Critical Dimensions of the  $N = 1$  and  $N = 2$  Spinning String Derived from Fujikawa’s Approach, with P. Bouwknicht, *Class. Quan. Gravity* **3** 207 (1986).
160. A Covariant Action for the  $SU(2)$  Spinning String as a Hyperkähler or quaternionic nonlinear sigma model, with M. Pernici, *Phys. Lett.* **B169** 381 (1986).
161. The Action of the  $N = 1$  and  $N = 2$  Spinning Strings as Conformal Supergravities, *Int. Journal of Modern Physics A* **1** 155 (1986).
162. A Minimal Covariant Action for the Free Open Spinning String Field Theory, G. D. Daté, M. Günaydin, M. Pernici and K. Pilch, *Phys. Lett.* **B171** 182 (1986).
163. Conformal Supergravities as Poincaré Supergravity in  $d = 4$ , Chern-Simons Terms in  $d = 3$  and Spinning Strings in  $d = 2$ , in “Supersymmetry, a Decade of Development”, P. West, ed., Adam Hilger 1986.
164. On Five-Dimensional Quantization Chern-Simons Terms, with A. Ceresole and A. Lerda, *Phys. Rev.* **D34** 1744 (1986).
165. Superspace Path-Integral Measure of the  $N = 1$  Spinning String, with M. Rocek and S.-C. Zhang, *Ann. of Phys.* **172** 348 (1986).
166. Chern-Simons Terms in Supergravity, with A. Ceresole, A. Lerda and P. Pizzochero, Proceedings Fourth Marcel Grossman Meeting in Rome, volume A, page 167, R. Ruffini editor, North-Holland Publishing Company 1986.
167. An Introduction to Supergravity Theories in 4, 11, 10, 3 and 2 Dimensions, with A. Ceresole and A. Lerda, Proceedings Meeting at Taiwan.

168. Critical Dimensions and Supersymmetric Measures, Proceedings 1986 Trieste School on Supersymmetry, Supergravity and Superstrings, B. de Wit, M. T. Grisaru and P. Fayet, eds., 1987
169. The BRST Formalism for the Open Spinning String, Proceedings Summer School at Dubrovnik, p. 85, June 1986, M. Martinis, and I. Andric, eds., World Scientific 1987.
170. The Gravitational Path-Integral Measure and Critical Dimensions of Linear and Nonlinear Locally Supersymmetric  $\sigma$ -Models, Proceedings Latin-America School, Chili, December, 1985, C. Teitelboim editor, Plenum Press, 1988, page 185.
171. On 3rd Non-Linear Vector Duality, with A. Karlhede, U. Lindstrom and M. Roček, *Phys. Lett. B***186** 96 (1987).
172. Supersymmetric Vector-Vector Duality, with A. Karlhede, U. Lindstrom and M. Roček, *Cl. Q. Gr* **4** 549 (1987).
173. Critical Dimensions of Spinning Strings on Group Manifolds from Fujikawa's Method, with A. Eastaugh, L. Mezincescu and E. Sezgin, *Phys. Rev. Lett.* **57**, 29 (1986).
174. Diagonalization of the Free Open Spinning String and Critical Dimensions of Non-linear Sigma Models, Proceedings Second Nobel Symposium on Particle Physics, *Physica Scripta*, Vol. T**15** 95 (1987).
175. Critical Dimensions for Strings on Group Manifolds from Path-Integral Methods, with A. Ceresole, A. Lerda, P. Pizzochero, *Phys. Lett.* **189B** 34 (1987).
176. A Weyl-Invariant Rigid String with U. Lindström and M. Roček, *Phys. Lett B***199** 219 (1987).
177. Supersprings, with T. L. Curtright, *Nucl. Phys.* **B294** 125 (1987).
178. The Regularized BRST-Invariant Measure, with K. Fujikawa, U. Lindstrom, N. K. Nielsen and M. Roček, *Phys. Rev.* **D37** 391 (1988).
179. The Supersymmetric Regularized Path-Integral Measure in x-Space, with U. Lindstrom, N. K. Nielsen and M. Roček, *Phys. Rev.* **D37** 3588 (1988).
180. Gauge Independence of the Local Trace Anomaly of Vectors and Antisymmetric Tensor Fields, with N. K. Nielsen, *Phys. Rev.* **D38**, 3183 (1988).
181. Do Supermembranes Contain Massless Particles?, with L. Mezincescu and R.I. Nepomechie, *Nucl. Phys.* **B309** 317 (1988).

182. Relation Between Lagrangian and Hamiltonian BRST Charges for the Bosonic String in Arbitrary Gauges, with V. Del Duca and L. Magnea, *Int. J. of Mod. Phys. A* **3** 1081 (1988).
183. Gravitational Corrections to Yang-Mills Chern-Simons Terms, with A. Lerda, *Phys. Rev. Lett.* **62** 1217 (1989).
184. Small Oscillations of Regular Polytopes, with A. E. Eastaugh, *J. Math. Phys.* **30** 252 (1989).
185. Supermembranes, Superstrings and Supergravity, Proceedings 2nd Chili Winter School.
186. The Curved-Space Trace, Chiral and Einstein Anomalies from Path-Integrals Using Flat-Space Plane Waves, with A. Ceresole and P. Pizzochero, *Phys. Rev. D* **39** 1567 (1989).
187. Chiral Bosons Coupled to Supergravity, with F. Bastianelli, *Phys. Lett.* **B217** 98 (1989).
188. Compactifications of  $d = 11$  Supergravity on Kähler Manifolds, with C. N. Pope, *Comm. Math. Phys.* **122** 281 (1989).
189. Rigidly and Locally Supersymmetric Two-Dimensional Nonlinear Sigma-Models with Torsion, with B. de Wit, *Nucl. Phys.* **B312** 58 (1989).
190. The extended Sugawara construction for the superalgebras  $SU(M + 1/N + 1)$ . Part I: Free field representation and bosonization of super Kac-Moody currents, with P. Bouwknegt, A. Ceresole and J. G. McCarthy, *Phys. Rev. D* **39** 2971 (1989).
191. Auxiliary Fields for  $d = 2$   $N = 4$  supergravity, with S. J. Gates and Y. Hassoun, *Nucl. Phys.* **B317** 302 (1989).
192. The Quantum BRST Charge for Quadratically Nonlinear Lie Algebras, with A. Sevrin and K. Schoutens, *Comm. Math. Phys.* **124** 87 (1989).
193. Conformal Field Theory, BRST Cohomology and No-ghost Theorems, Teylers lectures given at Leyden University, 1987 and at Stony Brook, 1988.
194. The Extended Sugawara Construction for the Superalgebras  $SU(m/n)$ . Part II, the  $3^{rd}$  order Casimir algebra, with P. Bouwknegt, A. Ceresole and J. McCarthy, *Phys. Rev. D* **40** 415 (1989).

195. Supersymmetric Sigma Models with Nonvanishing Nijenhuis Tensor and their Operator Expansion, with G. Delius, M. Roček and A. Sevrin, *Nucl. Phys. B***324** 523 (1989).
196. Understanding Fujikawa Regulators from Pauli-Villars Regularization of Ghosts, with A. Diaz, T. Van Proeyen and W. Troost *Int. J. Mod. Phys. A* **4** 3959 (1989).
197. Anomalies in Quantum Field Theory, Leuven Notes in Mathematical and Theoretical Physics, Series B, volume 3, 1989.
198. Lorentz Covariant Quantization of the Superparticle, with U. Lindström, M. Roček, W. Siegel and A. van de Ven, *Phys. Lett. B***224** 285 (1989).
199. Gravitational Anomalies from the Action for Selfdual Antisymmetric Tensor Field in  $4k + 2$  Dimensions, with F. Bastianelli, *Phys. Rev. Lett.* **63** 728 (1989).
200. Lorentz Covariant Quantization of the Heterotic Superstring, with S. J. Gates, M. T. Grisaru, U. Lindström, M. Roček, W. Siegel and A. E. van de Ven, *Phys. Lett. B***225** 44 (1989).
201. Anomalies in the Batalin-Vilkovisky Lagrangian Formalism, with A. Van Proeyen and W. Troost, *Nucl. Phys. B***333** 727 (1990).
202. Covariant Superparticle Quantization in a Super Maxwell Background, with M. Roček, W. Siegel and A. E. van de Ven, *Phys. Lett. B***227** 87 (1989).
203. Construction of the Covariantly Quantized Heterotic Superstring, with U. Lindström, M. Roček, W. Siegel and A. E. van de Ven, *Nucl. Phys. B***330** 19 (1990).
204. The Regularized Phase Space Path-integral Measure for a scalar field coupled to gravity, with M. Hatsuda, A. Van Proeyen and W. Troost, *Nucl. Phys. B***335** 166 (1990).
205. Gauge-fixing redundant symmetries in the superparticle, with U. Lindström, M. Roček, W. Siegel and A.E. van de Ven, *Phys. Lett. B***228**, 53 (1989).
206. Supersymmetric nonlinear  $d = 2$   $\sigma$ -models with nonvanishing Nijenhuis tensor, with G.W. Delius, Proceedings Texas A&M Conference 1989, page 443, R. Arnowitt et al. editors, World Scientific 1990.
207. The method of coadjoint orbits applied to the super Virasoro algebra, with G.W. Delius and V.G.J. Rodgers, *Int. J. Mod. Phys. A* **5** 3943 (1990).

208. Consistent Fujikawa regularization of the spinning string from Pauli-Villars regularization, with F. Bastianelli, *Phys. Rev. D* **41** 2525 (1990).
209. Covariantly quantizable superparticle, with A. Mikovic, M. Roček, W. Siegel, J. Yamron, A.E. van de Ven, *Phys. Lett. B* **235** 106 (1990).
210. On the covariant quantization of the first-class superparticle, with U. Lindström, M. Roček, W. Siegel and A.E. van de Ven, *J. Math. Phys.* **31** 1761 (1990).
211. A new gauge theory for  $W$ -type algebras, with K. Schoutens and A. Sevrin, *Phys. Lett. B* **243** 248 (1990).
212. Covariant  $w_\infty$  gravity and its reduction to  $W_N$  gravity, with K. Schoutens and A. Sevrin, *Phys. Lett. B* **251** 355 (1990).
213. Covariant formulation of classical  $W$ -gravity, with K. Schoutens and A. Sevrin, *Nucl. Phys. B* **349** 791 (1991).
214. Uniqueness of the gauge-invariant Fujikawa measure for the bosonic string, with J. Kowalski-Glikman, *Int. J. Mod. Phys. A* **6**, 4077 (1991).
215. Progress towards a new gauge theory for  $W$  type algebras, with K. Schoutens and A. Sevrin, Proceedings Strings '90, pages 335-347, editors R. Arnowitt et al., World Scientific 1991.
216. Towards a theory of  $W_3$  gravity, with K. Schoutens and A. Sevrin, Proceedings Argonne 1990 Workshop on Quantum Groups, pages 321-335, eds. T. Curtright et al., World Scientific 1991.
217. Properties of covariant  $W$  gravity, with K. Schoutens and A. Sevrin, Proceedings Trieste conference on Topological methods in quantum field theory, *Int. J. Mod. Phys. A* **16** 2891 (1991).
218. Anomalies from regularized phase space path integrals for Maxwell fields, with E. Laenen, *Ann. of Phys.* **207** 77 (1991).
219. Consistent anomalies from Hamiltonian path-integrals, *Nucl. Phys. B* (Proc. Supp.) **16** 605 (1990).
220. Nonlinear Yang-Mills theories, with K. Schoutens and A. Sevrin, *Phys. Lett. B* **255** 549 (1991).
221. Superstring anomalies in the semi-light-cone gauge, with F. Bastianelli and A. Van Proeyen, *Phys. Lett. B* **253** 67 (1991).

222. Quantum chiral  $W_3$  gravity, with K. Schoutens and A. Sevrin, *Nucl. Phys.* **B364** 584 (1991).
223. Loop calculations in BRST quantized chiral  $W_3$  gravity, with K. Schoutens and A. Sevrin, proceedings 1991 Miami conference, eds. T. Curtright, L. Mezincescu and R. Nepomechie, World Scientific 1992, pages 283-302.
224. The induced action of  $W_3$  gravity, with H. Ooguri, A. Schoutens and A. Sevrin, *C.M.P.* **145**, 515 (1992).
225. On the effective action of chiral  $W_3$  gravity, with K. Schoutens and A. Sevrin, *Nucl. Phys.* **B371** 315 (1992).
226. Induced gauge theories and  $W$  gravity, with K. Schoutens and A. Sevrin, in ref. 227, page 558.
227. “Strings and Symmetries 1991”, Proceedings of the Stony Brook conference, May 20-25, 1991, World Scientific 1992, editors N. Berkovits, H. Itoyama, K. Schoutens, A. Sevrin, W. Siegel, P. van Nieuwenhuizen and J. Yamron.
228. Example of a quantum field theory based on a nonlinear Lie algebra, in ref. 229, page 215-258.
229. Gauge theories, past and future, Festschrift for M. Veltman. Editors R. Akhoury, B. de Wit, H. Veltman and P. van Nieuwenhuizen, World Scientific 1992.
230. Absence of world-sheet and space-time anomalies in the semi-covariantly quantized heterotic string, with M. Porrati, *Phys. Lett.* **B273** 47 (1991).
231. BRST-quantization of gauge theories: the Lagrangian, Hamiltonian and BV method, Teylers lectures, 1991, given at Leyden University and van der Waals lectures given at Amsterdam University, 1991.
232. Quantum  $W_3$  gravity, with K. Schoutens and A. Sevrin, Proc. Trieste Summerschool “High Energy Physics and Cosmology 1991”, World Scientific 1992, pages 903-916.
233. Loop calculations in two-dimensional nonlocal field theories, with M.T. Grisaru, *Int. J. of Mod. Phys. A* **7** 5891 (1992).
234. Trace anomalies from Quantum mechanics, with F. Bastianelli, *Nucl. Phys.* **B389** 53 (1993).
235. Induced  $(N, 0)$  supergravity as a constrained  $Osp(N|2)$   $WZW$  model and its effective action, with G.W. Delius and M.T. Grisaru, *Nucl. Phys.* **B389** 25 (1993).

236. The regularized BRST Jacobian of pure Yang-Mills theory, with F. DeJonghe, R. Siebelink, W. Troost, S. Vandoren and A. Van Proeyen, *Phys. Letts. B***289** 354 (1992).
237. Solvable extensions of two-dimensional gravity, with G. Delius, M.T. Grisaru, K. Schoutens and A. Sevrin, Proceedings Journées Relativiste 1992, *Class. and Quan. Grav.* **10** Supplement, S109.
238. Solvable extensions of two-dimensional gravity, Proceedings les Houches Summer-school 1992 on Gravitations and Quantizations, B. Julia and J. Zinn-Justin editors, Elsevier Science BV 1995, 637-646.
239. Is the Green-Schwarz superstring anomalous?, with M. Porrati, in “Strings, quantum gravity, and the unification of the fundamental interactions”, M. Bianchi et al. editors, page 468, World Scientific, 1993.
240. Quantum gauging from classical gauging of nonlinear Lie algebras, with A. Sevrin, *Phys. Rev. D***48** 1768 (1993).
241. Canonical quantization of gauge theories, Teylers lectures 1992 given at Leyden University.
242. Operator ordering and path integration for nonlinear sigma models with and without fermions, with B. Peeters, Proceedings HEP Europhysics conference, Marseille, 1993, page 98.
243. The WZWN model at two loops, with B. de Wit and M.T. Grisaru, Proceedings HEP Europhysics conference at Marseille 1993, page 85.
244. The WZWN model at two loops, with B. de Wit and M.T. Grisaru, *Nucl. Phys. B***408** 299 (1993).
245. Canonical quantization in  $n.A = 0$  gauges with P.V. Landshoff, *Phys. Rev. D***50** 4157 (1994).
246. Topics in quantum field theory: the Goldstone theorem, BRST renormalization of Higgs models, the axial gauge and path integrals for fermions, Teylers lectures 1993 given at Leyden University.
247. The Goldstone theorem at two loops from an algebraic identity, with A. Waldron, *Int. J. Mod. Phys. A* **10** 1237 (1995).

248. Multiplicative renormalization of the spontaneously broken SU(2) Higgs model, with A. Schilling, *Phys. Rev. D***50** 967 (1994).
249. Loop calculations in quantum-mechanical nonlinear sigma models, with Jan de Boer, Bas Peeters, Kostas Skenderis, *Nucl. Phys. B***446** 211 (1995).
250. The WZWN model at two loops and induced chiral actions, with M.T. Grisaru and B. de Wit, proceedings Strings Conference 1993 at Berkeley, page 57, and in Trieste Proceedings on High-energy physics and cosmology, 1994, page 4.

256. Loop calculations in quantum mechanical nonlinear sigma models with fermions and applications to anomalies, with Jan de Boer, Bas Peeters, Kostas Skenderis, *Nucl. Phys. B***459** 631 (1996).
257. On the renormalizability and unitarity of the Curci-Ferrari model for massive vector bosons, with Jan de Boer, Kostas Skenderis and Andrew Waldron, *Phys. Lett. B***367** 175 (1996).
258. On massive vector bosons without Higgs fields, proceedings Venezuela conference, October 1995, to be published.

259. New Feynman rules for quantum mechanical nonlinear sigma models, with Jan de Boer, Bas Peeters, Kostas Skenderis, Proceedings 1995 HEP European Physical Society conference in Brussels, July 1995, page 106.
260. A continuous Wick rotation for spinor fields, with A. Waldron, *Phys. Lett. B***389** 29 (1996).
261. BRS symmetry versus supersymmetry in Yang-Mills-Chern-Simons theory, with F. Ruiz-Ruiz, *Nucl. Phys. B***486** 443 (1997).
262. “Lectures on supersymmetry and supergravity in  $2 + 1$  dimensions and regularization of supersymmetric gauge theories”, with F. Ruiz-Ruiz, Recent developments in Gravitation and Mathematical Physics, A. Garcia et al eds, Science Network Publishing 1998.
263. Path integrals for quantum mechanics in curved spacetime (or anomalies from nonlinear sigma models), in “Particles and Fields”, page 291, proceedings 8th Swieca Summerschool, Rio de Janeiro, 1995, V.O. Rivelles et al. eds., World Scientific, 1997. Also Andrejewski lectures at the Humboldt University in Berlin, June 1996.
264. A continuous Wick rotation for spinor fields and supersymmetry in Euclidean space, with Andrew Waldron, Proc. workshop at Imperial College, Imperial College Press, London (1997) 394.
265. Fusing the coordinates of quantum superspace, with Peter Bouwknegt and Jim McCarthy, *Phys. Lett. B***394** 82 (1997).
266. On a possible new theory of supergravity, with T. Hurth, C. Preitschopf and A. Waldron, *Phys. Rev. D***55** 7593 (1997), hep-th/97 02052.
267. Osp(1/8)-gravity, with C.R. Preitschopf, T. Hurth and A. Waldron, *Nucl. Phys. Proc. Suppl. B* **56** 310 (1997), D. Luest et al. eds., hep-th/9702123.
268. Polynomial form of the Stueckelberg model, with N. Dragon and T. Hurth, *Nucl. Phys. Proc. Suppl. B* **56** 318 (1997), hep-th/9703017.
269. No saturation of the quantum Bogomolnyi bound by two dimensional  $N = 1$  supersymmetric solitons, with A. Rebhan, *Nucl. Phys. B***508** 449 (1997), hep-th/9707163.
270. Trace and chiral anomalies in string theory and ordinary field theory from Feynman diagrams for nonlinear sigma models, with A. Hatzinikitas and K. Schalm, *Nucl. Phys. B***518** 424 (1998), hep-th/9711088.

271. Mode regularization, time slicing, Weyl-ordering and phase space path integrals for quantum mechanical nonlinear sigma models, with F. Bastianelli and K. Schalm, *Phys. Rev. D* **58** 044002-1 (1998), hep-th/9801105.
272. Topological boundary conditions, the BPS bound, and elimination of ambiguities in the quantum mass of solitons, with H. Nastase, M. Stephanov and A. Rebhan, *Nucl. Phys. B* **542** 471 (1999), hep-th/9802074.
273. Trace anomalies and the string-inspired definition of quantum-mechanical path integrals in curved space, with K. Schalm, *Phys. Lett. B* **446** 247 (1999), hep-th/9810115.
274. The quantum mass of the susy kink and the BPS bound, proceedings “Trends in theoretical physics II”, Buenos Aires, American Institute of Physics, 1999 page 41.
275. Consistent nonlinear KK reduction of 11-d supergravity on  $AdS_7 \times S_4$ , and selfduality in odd dimensions, with H. Nastase and D. Vaman, *Phys. Lett. B* **469** 96 (1999), hep-th/9905075.
276. Conformal anomaly for 2d and 4d dilaton, coupled spinors, with Shin’ichi Nojiri and Sergei D. Odintsov, *Phys. Rev. D* **60** 084014 (1999), hep-th/9901119.
277. Consistency of the  $AdS_7 \times S_4$  reduction and the origin of selfduality in odd dimensions, with H. Nastase and D. Vaman, *Nucl. Phys. B* **581** 179 (2000), hep-th/9911238.
278. Instantons, Euclidean supersymmetry and Wick rotations, with A. Belitsky and S. Vandoren, *Phys. Lett. B* **477** 335 (2000), hep-th/0001010.
279. Yang-Mills - and D-instantons, with A.V. Belitsky and S. Vandoren, *Class. Quant. Grav.* **17** 3521 (2000), hep-th/0004186.
280. Dimensional regularization of the path integral in curved space on an infinite time interval, with F. Bastianelli and O. Corradini, *Phys. Lett. B* **490** 154-162 (2000), hep-th/0007105.
281. Dimensional regularization of nonlinear sigma models on a finite time interval, with F. Bastianelli and O. Corradini, *Phys. Lett. B* **494** 161-167 (2000), hep-th/0008045.
282. Once more on the BPS bound for the susy kink, with A. Litvintsev, hep-th/0010051.

283. Mode regularization of the susy sphaleron and kink: zero modes and discrete gauge symmetry, with A. Goldhaber and A. Litvintsev, *Phys. Rev. D* **64** 045013 (2001), hep-th/0011258.
284. New instantons in the double-well potential, with S. Vandoren, *Phys. Lett. B* **499** 280-286 (2001), hep-th/0010130.
285. New results for the quantum supersymmetric kink, in “Quantization, gauge theory and strings”, Proceedings 2d Sakharov conference Moscow 2000, volume II, page 83, World Scientific, 2001, with A. Goldhaber and A. Litvintsev, hep-th/0011273.
286. No van Dam-Veltman-Zacharov discontinuity in AdS space, with A. Grassi, *Phys. Lett. B* **499** 174-178 (2001), hep-th/0011278.
287. Local Casimir energy for solitons, with A. Goldhaber and A. Litvintsev, hep-th/0109110, *Phys. Rev. D* **67** 105021 (2003).
288. Ward identities for  $N = 2$  rigid and local supersymmetry in Euclidean space, with U. Theis, *Class. Quant. Grav.* **18** 5469 (2001), hep-th/0108204.
289. “Supersymmetric” boundary conditions and the susy kink, with A. Goldhaber and A. Litvintsev, in preparation.
290. Heat kernels and zeta-function regularization for the mass of the susy kink, with M. Bordag, A. Goldhaber and D. Vassilevich, hep-th/0203066, *Phys. Rev. D* **66** 085010 (2003).
291. Towards covariant quantization of superstrings without pure spinor constraints, with P.A. Grassi, G. Policastro and M. Porrati, *JHEP* **10** 054 (2002), hep-th/0112162.
292. Conformal (super) gravities with several gravitons, with N. Boulanger and M. Henneaux, *JHEP* **0201** 035 (2002), hep-th/0201023.
293. Open string boundary conditions and bulk tachyons, with U. Lindström and M. Roček, YITP-SB-02-18, hep-th/0211266, *Nucl. Phys. B* **662** 147 (2003).
294. One-loop surface tensions of (supersymmetric) kink domain walls from dimensional regularization, with A. Rebhan and R. Wimmer, *New Journ. Phys.* **4** 31 (2002), hep-th/0203137.
295. The massless spectrum of covariant superstrings, with A. Grassi and G. Policastro, *JHEP* **0211** 001 (2002), hep-th/0202123.

296. On the BRST cohomology of superstrings with/without pure spinors, with A. Grassi and G. Policastro, YITP-SB-02-14, hep-th/0206216, *Adv. Theor. Math Phys.* **7** 499-524 (2003).
297. A toy model for supersymmetry, supergravity and superspace, in “The many faces of the superworld”, M. Shifman ed., World Scientific, page 649.
298. Super-Chern-Simons from topological super-particles, with P.A. Grassi and G. Policastro, YITP-SB-02-30 in preparation.
299. The covariant quantum superstring and superparticle from their classical action, with P.A. Grassi and G. Policastro, YITP-SB-02-29, hep-th/0209026, *Phys. Lett. B* **553** (2003) 96.
300. Clash of discrete symmetries of the supersymmetric kink on a circle, with A.S. Goldhaber, A. Rebhan and R. Wimmer, hep-th/0206229, *Phys. Rev. D* **66** 085010 (2002).
301. The anomaly in the central charge of the supersymmetric kink from dimensional regularization and dimensional reduction, with A. Rebhan and R. Wimmer, hep-th/0207051, *Nucl. Phys. B* **648** 174 (2003).
302. The infrared  $R^*$  operation, with S. Larin, hep-th/0212315, Internal report YITP-SB-02-48.
303. Supergravity celebrates twenty-five with G. Sterman, M. Roček and W. Siegel, CERN Courier, 42N7, 23-24 October 2002.
304. Comment on “One-loop renormalization of soliton quantum mass corrections in  $1 + 1$  dimensional scalar field theory models”, with A. Rebhan and R. Wimmer, YITP-SB-02-62, hep-th/0211149, *Phys. Lett. B* **552** 17 (2003).
305. Quantum corrections to the mass and central charge of solitons in  $1 + 1$  dimensions, Proceedings 3rd Sakharov conference, with A.S. Goldhaber, A. Rebhan and R. Wimmer, YITP-SB-02-61, hep-th/0211087.
306. Yang-Mills theory illustrating the covariant quantization of superstrings, Proceedings 3rd Sakharov conference, with P.A. Grassi and G. Policastro, YITP-SB-02-59, hep-th/0211095.
307. Path integrals for Quantum Mechanics in Curved Space, Supersymmetry, and Anomalies in Quantum Field Theories, book with F. Bastianelli, 213 pages.

308. Non-commutative superspace from string theory, with J. de Boer and P.A. Grassi, hep-th/0302076, *Phys. Lett. B* **574** (2003) 98.
309. An introduction to the covariant quantization of superstrings, Proceedings Leuven workshop, with P.A. Grassi and G. Policastro, hep-th/0302147, *Class. Quant. Grav.* **20** S395 (2003).
310. The quantum superstring as a WZNW model with  $N = 2$  superconformal symmetry, with P.A. Grassi and G. Policastro, hep-th/0307056, *Nucl. Phys. B* **676** (2004) 43.
311. Topological anomalies from the path integral measure in superspace, with K. Fujikawa, YITP-SB-03-03, hep-th/0305144, *Ann. of Phys.* **308** (2003) 78.
312. Nonvanishing quantum corrections to the mass and central charge of the  $N = 2$  vortex and BPS saturation, with A. Rebhan and R. Wimmer, hep-th/0307282, *Nucl. Phys. B* **679** (2004) 382.
313. Supersymmetry, supergravity, superspace and BRST symmetry in a toy model, four lectures, proceedings conference for D. Sullivan's 60th birthday, YITP-SB-02-19, *Proc. Am. Math. Soc.*, hep-th/0408179.
314. On the nature of the anomalies in the supersymmetric kink, with K. Fujikawa and A. Rebhan, hep-th/0309256, *Int. J. Mod. Phys. A* **18** (2003) 5637.
315. The Casimir effect for susy solitons, Proceedings of the QFEXT'03 conference at Oklahoma, with A. Rebhan and R. Wimmer, hep-th/0401127, K.A. Milton ed., Rinton Press (2004) page 158.
316. Quantum corrections to mass and central charge of supersymmetric solitons, with A.S. Goldhaber, A. Rebhan and R. Wimmer, hep-th/0401152, *Phys. Rep.* **398** (2004) 179.
317. A new anomaly in the central charge of  $N = 2$  monopoles, with A. Rebhan and R. Wimmer, hep-th/0401116, *Phys. Lett. B* **594** (2004) 234.
318. Superstrings and WZNW models, in "Quantum Theory and Symmetries", Proceedings 3rd Int. Symposium on quantum theory and symmetries, page 501, Cincinnati, Ohio, World Scientific 2004, P.C. Argyres et al. eds.
319. Harmonic superspaces from superstrings, with P.A. Grassi, hep-th/0402189, *Phys. Lett. B* **593** (2004) 271.
320. Gauging cosets, with P.A. Grassi, hep-th/0403224, *Nucl. Phys. B* **702** (2004) 189.

321. New developments in the quantization of supersymmetric solitons (kink, vortices and monopoles), with A. Rebhan and R. Wimmer, proceedings winter meeting in Brazil, hep-th/0404223, *Braz. J. Phys.* **34** (2004) 1273.
322. Supergravity from Yang-Mills theory, contribution to “Fifty years of Yang-Mills theory”, G. ’t Hooft editor, hep-th/0408137.
323.  $N = 4$  superconformal symmetry for the covariant quantum superstring, with P.A. Grassi, hep-th/0408007, *Phys. Lett. B* **610** (2005) 129.
324. BPS saturation of the  $N = 4$  monopole by infinite composite-operator renormalization, with A. Rebhan, R. Schöfbeck and R. Wimmer, hep-th/0502221.
325. Soft-gluon production due to a gluon loop in a constant chromo-electric background field, with G.C. Nayak, hep-th/0504070.
326. Consistent boundary conditions for supergravity, with D. Vassilevich, *Class. Qu. Gr.* **22** (2005) 5029, hep-th/0507172.
327. Anomalies and Path integrals in Curved Space, book with F. Bastianelli, CUP (2006), 379 pages.
328. Quantum mass and central charge of supersymmetric monopoles: Anomalies, current renormalization, and surface terms, with A. Rebhan and R. Wimmer, *JHEP* **0606** (2006) 056, hep-th/0601029.
329. Boundary terms in supergravity and supersymmetry, with A. Rebhan, D. Vassilevich and R. Wimmer, *Int. J. Mod. Phys. D* **15** (2006) 1, hep-th/0606075.
330. Perturbative quantum corrections to the supersymmetric  $CP^1$  kink with twisted mass, with C. Mayrhofer, A. Rebhan and R. Wimmer, *JHEP* **0709** (2007) 069, arXiv:0706.4476.
331. Tensor calculus for supergravity on a manifold with boundary, with Dmitry V. Belyaev, *JHEP* **0802** (2008) 047, arXiv:0711.2272.
332. Rigid supersymmetry with boundaries, with Dmitry V. Belyaev, *JHEP* **0804** (2008) 008, arXiv:0801.2377.
333. Lectures on Instantons, with S. Vandoren, arXiv:0802.1862.
334. Simple  $d = 4$  supergravity with a boundary, with Dmitry V. Belyaev, *JHEP* **0809** (2008) 069, arXiv:0806.4723.

- 335. Quantum corrections to solitons and BPS saturation, contribution to the memorial volume for Wolfgang Kummer, with A. Rebhan and R. Wimmer, arXiv:0902.1904.
- 336. One-loop results for kink and domain wall profiles at zero and finite temperature, with A. Rebhan and A. Schmitt, *Phys. Rev. D* **80** (2009) 045012, arXiv:0903.5242.
- 337. Holographic counterterms from local supersymmetry without boundary conditions, with D. Grumiller, *Phys. Lett. B* **682** (2010) 462, arXiv:0908.3486.
